

Hepatitis

Donated on 10/31/1988

From G.Gong: CMU; Mostly Boolean or numeric-valued attribute types; Includes cost data (donated by Peter Turney)

Dataset Characteristics

Multivariate

Subject Area

Health and Medicine

Associated Tasks

Classification

Feature Type

Categorical, Integer, Real

Dataset Information

Additional Information

Please ask Gail Gong for further information on this database.

Has Missing Values?

Yes

Variables Table

Variable Name	Role	Type	Description	Units	Missing Values
Class	Target	Categorical			no
Age	Feature	Integer			no
Sex	Feature	Categorical			no
Steroid	Feature	Categorical			yes
Antivirals	Feature	Categorical			no
Fatigue	Feature	Categorical			yes
Malaise	Feature	Categorical			yes
Anorexia	Feature	Categorical			yes
Liver Big	Feature	Categorical			yes
Liver Firm	Feature	Categorical			yes
Spleen Palpable	Feature	Categorical			yes
Spiders	Feature	Categorical			yes
Ascites	Feature	Categorical			yes
Varices	Feature	Categorical			yes

Variable Name	Role	Type	Description	Units	Missing Values
Bilirubin	Feature	Continuous			yes
Alk Phosphate	Feature	Integer			yes
Sgot	Feature	Integer			yes
Albumin	Feature	Integer			yes
Protime	Feature	Integer			yes
Histology	Feature	Integer			no

Additional Variable Information

- 1. Class: DIE, LIVE
- 2. AGE: 10, 20, 30, 40, 50, 60, 70, 80
- 3. SEX: male, female
- 4. STEROID: no, yes
- 5. ANTIVIRALS: no, yes
- 6. FATIGUE: no, yes
- 7. MALAISE: no, yes
- 8. ANOREXIA: no, yes
- 9. LIVER BIG: no, yes
- 10. LIVER FIRM: no, yes

- 11. SPLEEN PALPABLE: no, yes
- 12. SPIDERS: no, yes
- 13. ASCITES: no, yes
- 14. VARICES: no, yes
- 15. BILIRUBIN: 0.39, 0.80, 1.20, 2.00, 3.00, 4.00
-- see the note below
- 16. ALK PHOSPHATE: 33, 80, 120, 160, 200, 250
- 17. SGOT: 13, 100, 200, 300, 400, 500,
- 18. ALBUMIN: 2.1, 3.0, 3.8, 4.5, 5.0, 6.0
- 19. PROTIME: 10, 20, 30, 40, 50, 60, 70, 80, 90
- 20. HISTOLOGY: no, yes

The BILIRUBIN attribute appears to be continuously-valued. I checked this with the donater, Bojan Cestnik, who replied:

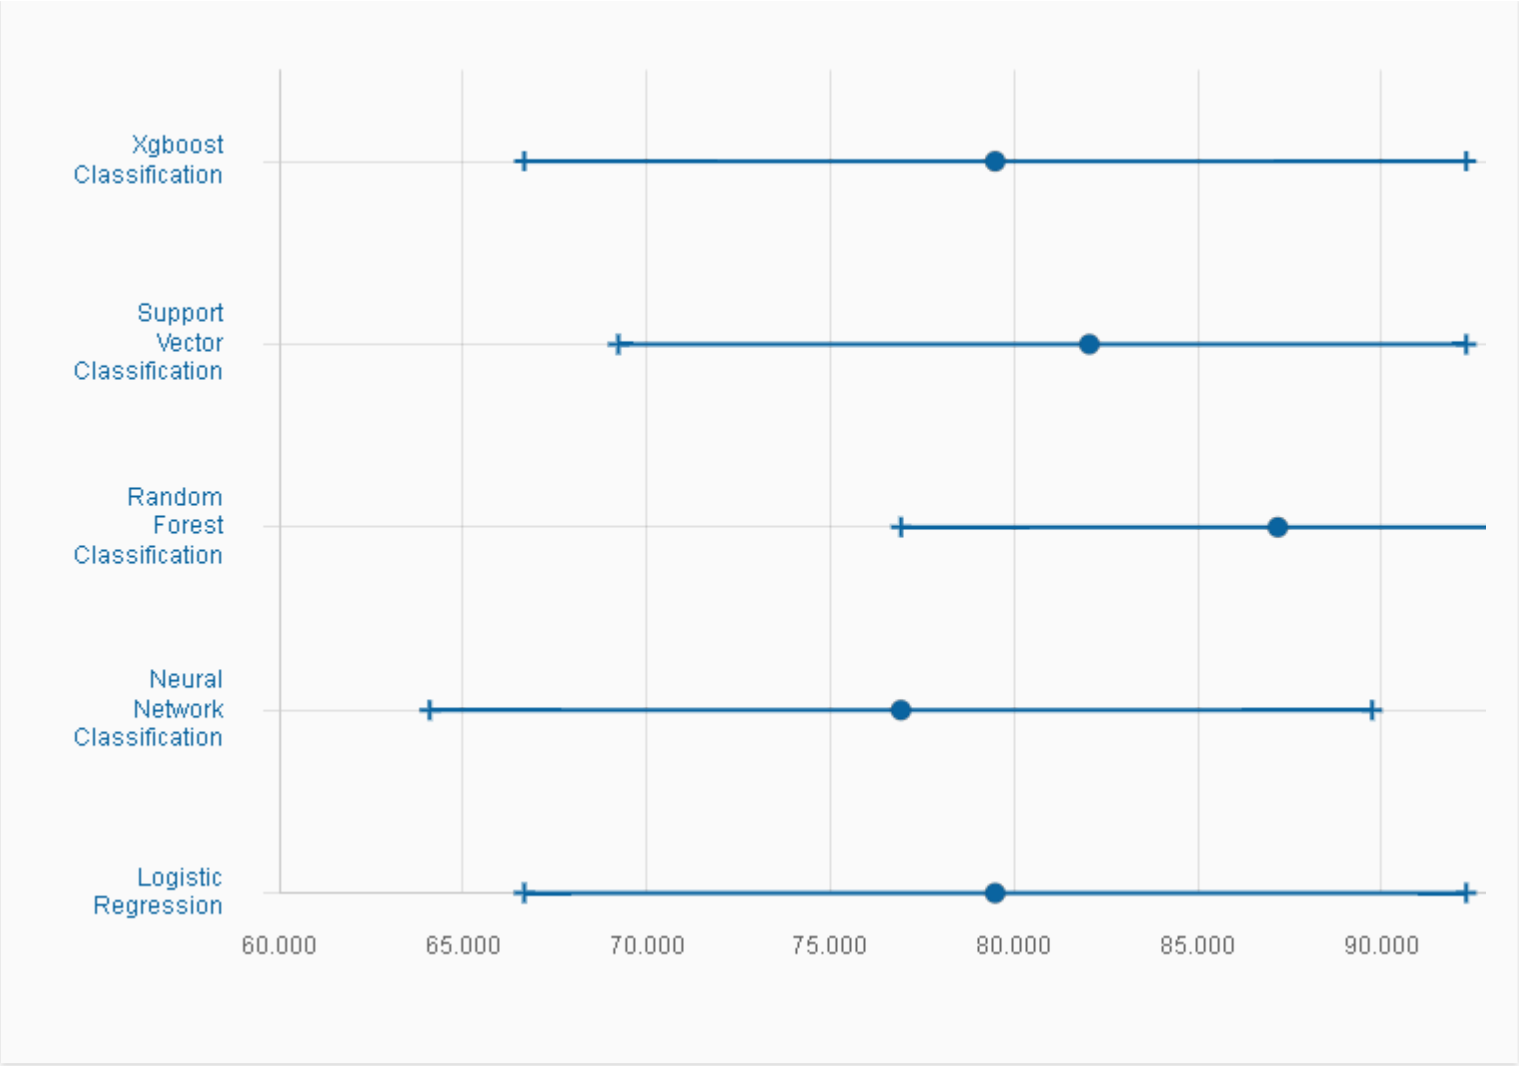

About the hepatitis database and BILIRUBIN problem I would like to say the following: BILIRUBIN is continuous attribute (= the number of it's "values" in the ASDOHEPA.DAT file is negative!!!); "values" are quoted because when speaking about the continuous attribute there is no such thing as all possible values. However, they represent so called "boundary" values; according to these "boundary" values the attribute can be discretized. At the same time, because of the continuous attribute, one can perform some other test since the continuous information is preserved. I hope that these lines have at least roughly answered your question.
