Dataset Information

Additional Information

- # From Garavan Institute
- # Documentation: as given by Ross Quinlan
- # 6 databases from the Garavan Institute in Sydney, Australia
- # Approximately the following for each database:
 - ** 2800 training (data) instances and 972 test instances
 - ** Plenty of missing data
 - ** 29 or so attributes, either Boolean or continuously-valued

2 additional databases, also from Ross Quinlan, are also here

** Hypothyroid.data and sick-euthyroid.data

** Quinlan believes that these databases have been corrupted

** Their format is highly similar to the other databases

1 more database of 9172 instances that cover 20 classes, and a related domain theory

Another thyroid database from Stefan Aeberhard

** 3 classes, 215 instances, 5 attributes

** No missing values

A Thyroid database suited for training ANNs

** 3 classes

** 3772 training instances, 3428 testing instances

** Includes cost data (donated by Peter Turney)
